

# Soldering Station with LCD Display

ESD Safe

Compact Station	High Temp Range	Deluxe Station
Saves Bench Space	Up to 550°C	Iron Stand Built-In

Aven's ESD safe Soldering Station with LCD Display is a temperature controlled soldering station featuring a compact design that takes up minimal bench top space, an LCD display with blue backlight, safety guard iron holder, and a high quality ceramic heater that heats quickly and is designed for reliable, long-lasting use. The temperature range (160°C-550°C) is suitable for manual mounting and reworking of SMD components, audio equipment, RC hobbies, and more. Soldering iron features a long life replaceable fine tip and comes with a 1.2m (4') heavy duty power cord. This exceptional soldering station also includes a recessed tip cleaning area with solid sponge for cleaning the iron tip as well as a small drawer in the base of the station for storing spare parts.

## Features:

- Powerful, heavy duty spring-loaded vacuum for complete solder removal
- Cushioned plunger, easy thumb activation and ribbed pencil grip
- Constructed from ESD safe plastic
- Provides surface resistivity for component protection

Soldering Station with LCD Display ESD Safe 405 Series	
Item Number	17405
Dimensions/Weight	9.25in × 6in × 3.375in / 1.6lbs
Rated Voltage Range	110V-130V
Rated Power Input	30W
Temperature Range	160°C-550°C (320°F-1020°F)
Tip Style	Standard Point Tip
